Dear Property Owner,

Re: Fats, Oils, and Grease (F.O.G.) Management Program

The City of Sarnia is developing a Fats, Oils, and Grease (F.O.G.) Management Program to assist restaurants and food handling facilities with proper handling and disposal of their fats, oils, and grease as well as the need for the installation and continual maintenance of their grease control devices. Through the implementation of the F.O.G. Management Program, these establishments will have the ability to significantly reduce the amount of fats, oils, and grease that are discharged from their facility. This decrease will minimize back-ups, sewer blockages, sanitary sewer overflows, and help business owners comply with the Sewer Use By-Law limit for oil and grease discharge (animal and vegetable).

The City of Sarnia is asking for your involvement in the program by completing the attached survey. This survey will identify the proper handling and disposal methods for fats, oils and grease produced by your facility; as well as the need for installation and continual maintenance of grease trap control devices on your property. Please complete the attached survey by November 27, 2015 and return to fogprogram@sarnia.ca.

For those who believe they have received this letter by mistake or for those with no access to electronic email please contact Katherine Gray at 519-332-0330, ext. 2245 for assistance.

Failure to provide information for this survey may be an indication to the City that there are problems associated with fats, oils and grease on site. Further investigation by the City due to lack of survey results could result in enforcement actions, which may include penalties, as set forth in the City of Sarnia, Sewer Use By-law No. 4 – 1993.

Your cooperation in this matter is greatly appreciated.

Yours truly,

A handwritten signature in black ink, appearing to read "K. Gray". The signature is written in a cursive, slightly slanted style.

Katherine Gray
Water & Wastewater Compliance Inspector
