

**November 18, 2013 - Special Meeting of Sarnia City Council –
Minutes Excerpt**

Presentation # 1

Centennial Park – Phase II ESA and Risk Assessment Presentation by Sandra Carrelas, Golder Associates

Sandra Carrelas of Golder Associates gave a PowerPoint presentation discussing the history of the project, results of the Phase II Environmental Site Assessment, risk assessment, and potential risk management options.

Ms. Carrelas responded to questions from Council dealing with environmental results and hazards, standards for asbestos, the need for a record of site condition and remedial action plan, remediation methods, and the process going forward.

The City Manager advised that Council has the option to receive the report for information which would allow for material to be published on the City's website and to receive input from the public. A decision on the next steps to be taken could be deferred to the December 2nd meeting.

Action Item #1

City Engineer, dated November 12, 2013, regarding Centennial Park – Record of Site Condition (RSC) Regulatory Process and Remedial Action Plan (RAP) – Next Steps

Moved by Councillor Foubister, seconded by Councillor Gillis, and **carried:**

That consideration of the next steps to be taken by Council with respect to Centennial Park be tabled to the December 2, 2013 meeting to allow for further review and to receive input from the public on the matter.
