

Crossing a roundabout as a pedestrian:

1. Do not attempt to cut across the middle of the roundabout
2. Follow the sidewalk on the outside of the roundabout until you reach the roadway you wish to cross; keep an eye out for approaching traffic, including in the roundabout, make eye contact to ensure they yield
3. When it is safe to do so, cross the roadway using the pedestrian crosswalk; if there is a centre island on the roadway you can use it to safely cross one lane of traffic at a time
