## CONSOLIDATED REVENUE FUND OPERATIONS

### Source of Funds (\$000's)

In 2024, actual revenue totaled \$195.3 million, exceeding both the budgeted \$166.6 million and 2023's \$189.1 million. Increases were driven by higher-than-expected user fees, grants, and other revenue, with property taxes remaining stable and slightly above budget.

|                          | 2024 Budget    | 2024 Actual    | 2023 Actual    |

1. The Consolidated Statement of Financial Position shows the City's financial position, which includes the assets, liabilities, and accumulated surplus, at a specific point in time. It provides information on what the municipality owns and owes to creditors.
2. Financial assets: assets easily accessible in the form of cash, cash deposits, cheques, loans, accounts receivable and marketable securities.
3. Liabilities: obligations arising from past transactions or events, the settlement of which is expected to result in an outflow of resources.
4. Net financial asset: the difference between financial assets and liabilities.
5. Non-financial assets: assets that are owned and will be utilized for future services and are not easily convertible to cash.
6. Accumulated surplus: this is an indicator of the City's overall financial health. It is the difference between the assets (financial and non-financial assets) as compared to the liabilities.

## CONSOLIDATED RESERVE AND RESERVE FUND OPERATION (\$000'S)

As of year-end 2024, the City's total reserves and reserve funds stood at \$130.3 million, a modest increase from \$122.7 million in 2023. While this growth reflects some progress, the overall reserve position remains below recommended levels, highlighting the need for continued focus on long-term financial sustainability and reserve replenishment. It's also important to note that a significant portion of these reserves has already been **committed to funding capital projects**, limiting their availability for other future needs.

## TANGIBLE CAPITAL ASSETS (\$000'S)

Tangible capital assets are recorded at their original cost, including all expenses directly related to acquisition, construction, improvement, or enhancement. These assets are then amortized over their estimated useful life, reflecting the portion of value consumed each year and their expected residual value at the end of that period.
